

(HYDRAM)

CONCEPT

- Hydrum is based on the concept of hydraulic ram.
- Mechanical device operates hydraulically using initial water pressure to lift water to 150-200 meters.
- Eco-friendly technology.
- Low maintenance cost.
- Easy operation.

Benefits of Hydrams

- Increased irrigation potential in tough terrains.
- Shift to cash crops and off-season vegetable.
- Availability of water for cattle at high altitude.
- Increase in income.
